

redisObject

```
classDiagram
    class redisObject
    class _redisSortOperation
    _redisSortOperation ..|> redisObject : pattern
```

The diagram illustrates a generalization relationship between two classes. At the top is a white rectangular box labeled 'redisObject'. At the bottom is a gray rectangular box labeled '\_redisSortOperation'. A dashed purple line connects the two boxes, with a solid purple arrowhead pointing upwards towards 'redisObject'. To the right of the dashed line, the word 'pattern' is written, indicating that this is a pattern-based generalization.

pattern

\_redisSortOperation
